REPORTS AND PUBLICATIONS by David Banks.

University Reports

- Banks, D. (1982).** The geology of the Middle and Upper Devonian rocks between Constantine and the Meropie Islands; near Padstow, North Cornwall. **Dept. of Earth Sciences, Univ. of Cambridge.** Final year mapping project. 21pp with diagrams. Dec.1982.
- Banks, D. (1984).** The health aspects of drinking-water quality, with emphasis on inorganic chemical parameters. **Dept. of Geological Sciences. University of Birmingham,** Literature study, 98pp, May 1984.
- Banks, D. (1984).** A computer program approximating organic pollutant transport to groundwater through the soil zone. **Dept. of Geological Sciences. University of Birmingham.** Computer project.
- Banks, D. (1984).** An investigation into the suitability of glacial sands, clays and gravels for use as basal liners of a landfill site. **Dept. of Geological Sciences, University of Birmingham.** M.Sc. thesis. 193 pp. Sept.1984.
- Banks, D. (2017).** [Integration of cooling into mine water heat pump systems \(v.F1.1\)](#). Report by University of Glasgow for EU Research Fund for Coal and Steel, project Low-Carbon After-Life (LoCAL): sustainable use of flooded coal mine voids as a thermal energy source. Funded by European Research Fund for Coal and Steel. March 2017. doi: [10.13140/RG.2.2.27377.48486](https://doi.org/10.13140/RG.2.2.27377.48486)
- Montcoudiol, N., Banks, D. Isherwood, C.E. & Gunning, A. (2018).** SHEER Deliverable D5.2. Impact of well construction and fracture stimulation on baseline hydrogeological conditions and on drinking water aquifers. Report for the EU SHEER project. doi: [10.13140/RG.2.2.27647.92324](https://doi.org/10.13140/RG.2.2.27647.92324)
- Banks, D. (2022).** Examining issues of circulation asymmetry in closed loop borehole heat exchangers. University of Glasgow report for the EPSRC INTEGRATE and NetZero-GEORDIE projects. Final version F1.2, 6th April 2022. doi: [10.13140/RG.2.2.15735.29608](https://doi.org/10.13140/RG.2.2.15735.29608)
